Roads and **Storm-Water**

This Business Unit specialises in the construction of major services including roads, bridges, toll roads, airport terminals, aprons and runways, quay walls and breakwaters in port facilities.

Our flagship project in this Business Unit is the Design and Construction of Sani Road in Grahamstown on behalf of Makana Local Municipality which falls in the Eastern Cape Province. The Road was 5km long and included interlocker paving, sub-surface storm-water drainage, storm-water structures i.e. culverts, pipe crossings, dishes etc.

Municipal Engineering **Services**

The focus of this business unit is purely on municipal projects including environmental rehabilitation, institutional waste water treatment facilities, water purification works, water storage reservoirs, municipal roads & storm-water. We're involved in various Municipalities around the country providing world class services.

Buildings and Structures

Building activities cover the full scope of traditional construction providing infrastructure including healthcare facilities, transport nodes, retail and parkade developments, residential, office accommodation, educational institutions, stadia, hotels & leisure and industrial facilities. The Building business unit also undertakes select residential developments for major mining and industrial clients as well as mass housing for the public sector.

The Construction of Dora Nciza Hospital is one of our proud moments work as it provided the needy communities with services.

ElectroMech Engineering

The Business Unit undertakes mechanical and piping, electrical and instrumentation construction work in the industrial, mining; manufacturing; oil, gas & petrochemical, and power sectors.

This section is still be nurtured and will receive projects soon.
